

**ŠIAULIŲ
TECHNOLOGIJŲ
MOKYMO CENTRAS**

The Šiauliai Technology Training Centre is the largest educational institution in northern Lithuania. Students come here to study from all over the county. It has 8 departments which are located all over the city of Šiauliai. The school has several dormitories where most of the students live. They arrive at school on Sunday and leave on Friday. We conducted a survey on the choice of vehicles among students of the Mechanics department.

136 students took part in the survey.

How old are you?

How do you get to school every day?

How do you usually travel in your free time?

Would you forgo personal transport methods if public transport was free in your city?

What is most important to you when choosing a car?

If you could choose to get any vehicle, would you care about its environmental impact and eco-friendliness?

The survey showed that there is still a need for education on ecology and sustainability in our society, so taking part in this project is a great opportunity to learn from the practices of other countries.
